Name : Harshad Sanjay Teli.
Roll No : 15.
Batch : B1.

Linked List Assignment No 1

Write C program to accept integer from user and store its digits using single link list and display those digits

e.g. number=438 linked list 4-->3-->8

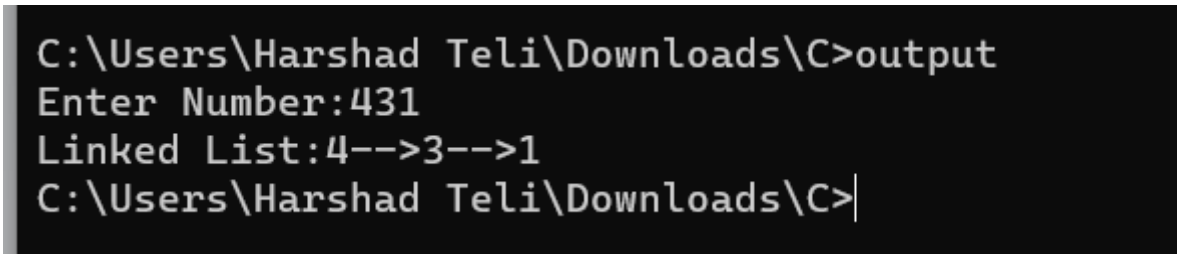

```
#include <stdio.h>
#include <stdlib.h>
struct node
{
    int data;
    struct node *next;
};

int main(){
 int num, digit;
struct node *head = NULL, *temp, *newnode;
 printf("Enter Number: ");
 scanf("%d", &num);
 int div = 1;
 while (num / div >= 10) {
     div = div * 10;
    }.
```

```
while(div>0)
{
  digit = num/div;
  num = num%div;
  div = div/10;
newnode = malloc(sizeof(struct node));
   newnode->data = digit;
   newnode->next = NULL;
   if(head == NULL){
      head = newnode;
}else{
      temp->next = newnode;
   }
    temp = newnode;
}
printf("Linked List: ");
temp = head;
while(temp != NULL)
{
   printf("%d",temp->data);
   if(temp->next != NULL){
     printf("-->");
   }
    temp = temp->next;
}
return 0;
}.
```

Output:

C:\Users\Harshad Teli\Downloads\C>output
Enter Number:431
Linked List:4-->3-->1
C:\Users\Harshad Teli\Downloads\C>
