

Assignment 2 -Unit 2: Measures of Central Tendency

Examples for Practice

Example 1: Calculate the A.M. for the following data of weights in kgs.

Weights (in kgs): 58, 55, 75, 45, 61, 62, 75, 45, 47, 51, 55, 52 [Ans; 73.3kgs]

Example 2: Calculate A.M. from the data given below

X: 10, 12, 14, 16, 18, 20, 22, 24, 26, 28, 30

f : 2, 8, 10, 12, 5, 17, 11, 9, 5, 4, 1. [Ans; 13.83]

Example 3: Find A.M. income from the data of 53 employees

Income (in '00 Rs.): 100-200 200-300 300-400 400-500 500-600 600-800 800-1000

No. of employees : 2 8 9 10 13 7 4

[Ans; 483.02Rs.]

Example 4: Find the Median from the following data.

Marks	0-10	10-20	20-30	30-40	40-50
No. of students	4	14	22	8	2

[Ans; Me= 23.18, Q1=16.07, Q3=28.86]

Example 5: Calculate Median from the following data .

Marks	0-10	10-20	20-30	30-40	40-50	50-60	60-70	70-80
No. of students	5	7	8	12	28	22	10	8

Ans : Me =46.43, Q1= 34.17, Q3= 56.81]

Example 6 : Calculate Mode for the following data

Class	10-20	20-30	30-40	40-50	50-60	60-70	70-80
f	24	42	56	66	108	130	154

[Ans : 71.34]

Example 7 : Calculate Mean, Median. Mode for the following data

Marks	0-10	10-20	20-30	30-40	40-50	50-60	60-70	70-80	80-90
No. of students	4	2	18	22	21	19	10	3	1

[Ans : Mode-41.3]

Example 8 : Find the Mean, Median, Mode for the following data

Wages in Rs.	30-40	40-50	50-60	60-70	70-80
No. of workers	9	13	25	11	7

[Ans; Mean 54.07 , Median 54.2]

Example 9 : Find the Mean, Median, Mode for the following data

Weight(Kg)	30-40	40-50	50-60	60-70	70-80	80-90
Frequency	18	37	45	27	15	8

Example 10 : Find the Mean, Median, Mode for the following data

Score	0-5	5-10	10-15	15-20	20-25	25-30	30-35	35-40	40-45	45-50
Frequency	6	12	50	120	225	250	185	110	32	10
