

Assignment No: 5.

Q.1] :hover - Button Styling

Create a button with the ~~next~~ text "Submit", using the :hover pseudo-class.

- change the text color to white
- change the background color to green
- change the font size to 18 px.
- Add a border-radius of 5 px

```
→ <html>
  <head>
    <title> Hover effect </title>
  </head>
  <body>
    <button> Submit </button>
    <style>
      button: hover {
        color: white
        background-color: green
        font-size: 18 px
        border-radius: 5px
      }
    </style>
  </body>
</html>
```

Q.2] :active - Button click effect.

Create a button with the text "click Me".

Using the :active Pseudo-class:

- change the text color to white
- change the background color to red.
- change the font size to 20 px

- change the border to 2px solid black while the button is being clicked.

```
→ <html>
  <head>
    <title> <|title>
    <style>
      .my-btn {
        background-color: lightblue;
        color: black;
        padding: 10px 20px;
        font-size: 16px;
        border: 1px solid gray;
        cursor: pointer;
      }
      .my-btn:active {
        color: white;
        background-color: red;
        font-size: 20px;
        border: 2px solid black;
      }
    </style>
  </head>
  <body>
    <button class="my-btn"> Click Me </button>
  </body>
</html>
```

Q3] : Visited - Visited Links
Create three hyperlinks.

- Example
- IANA
- W3C

using the :visited pseudo-class.

- change the text color of a visited link to purple
- Also use :hover to change the link color to red when the mouse pointer is over it

→ <h1 style>

```
a {  
  text-decoration: none;  
  font-size: 18px;  
  margin: 10px;
```

```
}  
a: hover {  
  color: red;
```

```
}  
a: visited
```

```
{  
  color: purple;
```

```
}  
</style>
```

```
<body>
```

```
<a href=" " >Example </a>
```

```
<a href=" " > IANA </a>
```

```
<a href=" " > W3C </a>
```

```
</body>
```
